PHOTOGRAPHIC INTELLIGENCE BRIEF
CIA/RR-HTA

INSTALLATION:	Pavlodar Aluminum Combine	BRIEF NO.:	B-91-57
LOCATION:	Pavlodar, USSR	DATE:	1 October 1957
B.E. NUMBER:	None	LAT.:	52°18'N
WAC NUMBER:	162	LONG.:	76°58'E

REFERENCE:

ATMP:  1st Ed., Nov 1955

REQUIREMENT RR/HTA/E/R39/57: Locate and describe the new aluminum combine reportedly under construction in the vicinity of Pavlodar, USSR.

REMARKS:

The area within a 17-mile radius of Pavlodar has been scanned for a reported aluminum combine. There is no installation within this area that can be so identified.

On the northeast outskirts of Pavlodar a plant is under construction within a fenced area 4,700 by 3,100 feet. Foundations for four buildings are under way, and ditches for pipelines have been dug. However, the dimensions and shapes of the building foundations now present are not what would be expected for pot rooms or other components of an aluminum plant.
